

Product discontinuation MegaLine® Connect 45 (MC 45)

Dear valued customer

we would like to inform you about the discontinuation of our RJ 45 connectors "MC 45". Due to a non-availability of the compensation boards necessary for the MC 45 jack, no further production of the MC 45 took place since summer 2021. An alternative solution presented in the 1st quarter of 2022 was technically insufficient for our and your requirements. In effect, we are unable to continue offering the MC 45 jack and have now reached a point where we must inform you of the discontinuation of this product family.

In the meantime, we have been able to develop the **MC 45 Pro Plus** for you. With the newly developed module, the electrical performance is not only at the usual high level, but in addition, an improvement of the NEXT margin could be achieved compared to the discontinued product. Further advantages are a toolless installation as well as a 360°-degree shield contact. The product will be available in the formats "*Keystone*" as well as "*ELine*".

We would like to inform you with this letter that the products listed below will be discontinued from our product range with immediate effect.

We kindly ask for your understanding and will be happy to answer any questions you may have.

Sincerely,

A handwritten signature in blue ink, consisting of a stylized 'D' followed by a series of loops and a horizontal line.

David Schlenker

INNOVATION MC45 Pro Plus

*MC45 Pro
The plus for a perfect
data installation*

*Category 6A
360° shield contact*

+ A PLUS IN PERFORMANCE

The electrical values of the **MegaLine® connect 45 Pro Plus** will convince everybody. The GHMT confirms: **MC45 Pro Plus** is significantly better than required by the Cat. 6A standard.

+ A PLUS IN SPEED

Easy installation: As already known from the modules of the **MC45 Pro series** installation is child's play. Insert the wires, fix the cable and crimp them. It could hardly be easier. And this all without any special tools.

+ A PLUS IN FLEXIBILITY

Thanks to the internationally usable keystone format, the **MC45 Pro Plus** can be used almost everywhere. And in case of shortage of space, the little brother in the „ELine“ format is available immediately. This way, up to ports 48 can be realized on one RU.

+ A PLUS IN SATISFACTION

Easy installation, universal applicability and highest technical performance simply leave nothing to be desired.
