COMPANY PROFILE KERPEN DATACOM

Building on the activities of the Kerpenwerk, founded in Stolberg in 1919 and taken over by LEONI AG in 2006, KERPEN DATACOM GmbH started on 1 July 2021 with the production and trading of passive data network components, such as copper or fibre optic data cables, RJ45 connectors, patch cables and data centre equipment. Complete passive cabling systems are offered for high-end data rate, reliability and processability requirements. KERPEN DATACOM is one of the top 3 providers in Germany in this field.

The application of the product range spans from building infrastructure to Industry 4.0.

LAN office, LAN industry and data centre with the common denominator Ethernet and Internet Protocol (IP) are growing together and changing the communication landscape. KERPEN DATACOM GmbH also produces PVC compounds for the cable industry.
