

## Environmental protection at KERPEN DATACOM GmbH

- ▶ The core objective in the area of environmental protection is the **continuous improvement of environmental performance**.
- ▶ In our own interest, **natural resources should be conserved** and the impact on the environment and our employees should be avoided or minimised.
- ▶ **Environmental aspects** are taken into account in the planning and development of new products and production processes.
- ▶ In all areas of operation, the **avoidance of waste** applies. Non-avoidable waste is recycled or disposed of by certified specialist companies.
- ▶ We want to **strengthen the sense of responsibility** of our employees through awareness training in the area of environmental protection.
- ▶ Only contractors who have been **trained in accordance with legal regulations and our environmental protection standards** are used on our premises.
- ▶ Our minimum standards are based on **compliance with legal regulations**. Our management has committed itself in writing to continuous improvement in environmental protection.
- ▶ Our environmental management system according to **DIN EN ISO 14001:2015** is certified by TÜV Nord.
