

MegaLine® Vario Protect IP66

FEATURES:

Comprehensive Protection

Mechanical protection against dust and dirt ensures that your network connections function flawlessly even under extreme conditions.

Weatherproof and durable

Our IP66 network junction box is wind, UV, and weather-resistant, meaning it withstands the harshest environmental conditions, reliably safeguarding your connections.

Security in focus

Thanks to its robust design and lockable access protection, this junction box provides the security your data connections require.

Highest performance

Enjoy full data performance with Category 6_A and PoE requirements up to 10Gbps to ensure your networks run smoothly without any loss of speed.

ORDER INFORMATION
