

NEW MegaLine[®] E5-60 Cat. 6_A UTP

Powering Efficiency, Accelerating Performance

Revolutionize your Network with Our Category 6_A UTP Cable

Our state-of-the-art construction with minimized twist of pairs not only ensures exceptional signal timing and minimal delay but also boasts minimal attenuation. This innovative design principle, featuring short twist lengths, translates to shorter paths and consequently, significantly lower attenuation compared to other UTP constructions. This unique characteristic makes our cables the ideal choice for demanding network applications, where maintaining signal integrity is paramount.

+ Superior Performance

- minimized twist of pairs for optimal signal integrity and minimal delay
- excellent performance in demanding network applications

+ Maximized Efficiency

- up to 16% less energy loss for 90W PoE++ applications
- reduced cable diameter for lower material use

+ Highest Fire Protection for Your Safety

- special tapes ensure top fire safety
- meets CPR parameters for Dca, Cca and B2ca classes

+ Environmentally Friendly

- leading in environmental responsibility with advanced cable design contributes to a reduced ecological footprint

MegaLine[®] U-UTP

The Best Choice for your Network

The new MegaLine[®] E5-60 UTP Category 6_A cable is not just a leader in performance and efficiency; it's also a step forward in environmental responsibility. Upgrade your network and benefit from the technological advantages, reliability, and reduced ecological footprint MegaLine[®] E5-60 UTP offers.

MegaLine Cat. 6 & 6_A
